

Patrick Muller submitted the following additional information:

I like finding ways to improve operations using the same resources:

-- With my team I helped an organization eliminate project overruns so that projects were finished on time for clients and without overtime.

-- For student queues in an academic service unit, I reduced 20-minute wait times for students to virtually 0 minutes.

-- I identified a vendor that owed an organization nearly \$15,000 and recovered all of it for the organization.

In my management positions, I managed departmental budgets and performed human resources work, including:

-- hiring staff

-- evaluating staff

-- payroll

I would like the council to inform the community of L.O.S.T. revenues and how they are strategically being used for the community.

I would like the council to keep the community informed and involved from the outset on large initiatives like a new fire station or city administration offices.

I would like to raise the profile of Hills in the county so that everyone knows the opportunities to shop and do business in Hills and so that everyone knows how to recreate in Hills (our parade and fireworks, community-wide garage sales, summer music concert series, once-in-a-generation RAGBRAI pass-through town.)

I'm interested in pursuing concrete goals for where Hills would like to be as a community five, ten years from now.
